Report of Vermiculture

. The staffs and students of our department are actively participated in the programme on vermiculture practice on 19-9-2022. The process of vermiculture was explained by the guest Mr. Prakash to practices the vermicompost and the steps how to vermicompost is the product of the decomposition process using earthworm, to create a mixture of decomposing vegetable or food waste, bedding materials and vermicast.

Vermicomposting can also be applied for treatment of sewage and manure, fertilizer of vegetables and flowering plants. The students get a knowledge and awareness of the economical benefit of vermiculture. It might become awareness for them to protect the natural plantation free from hazadous or artificial fertilizers. It makes their potentialies to develop a tremendous growth in future.
