Webinar Report on INTELLECTUAL PROPERTY RIGHTS

INTRODUCTION

Intellectual property rights are the rights given to persons over the creations of their minds. They usually give the creator an exclusive right over the use of his/her creation for a certain period of time. As a Social Worker we need to know about the Intellectual property rights, so on Department of social work conducted the webinar. The webinar on “**Intellectual property rights**” was organised by the department of social work and research Centre of Nanjil catholic College of arts and science, kaliyakkavilai. On 28-08-2021 Saturday at 9am to 10am through Google meet. 41 participants participated in the webinar.

What are intellectual property rights?

Intellectual property (IP) is a term referring to a brand, invention, design or other kind of creation, which a person or business has legal rights over. Almost all businesses own some form of IP, which could be a Business asset.

Common types of IP include:

Copyright – this protects written or published works such as books, songs, films, web content and Artistic works;

Patents – this protects commercial inventions, for example, a new business product or process;

Designs – this protects designs, such as drawings or computer models;

Trade marks – this protects signs, symbols, logos, words or sounds that distinguish your products and Services from those of your competitors.

IP can be either registered or unregistered. With **unregistered** IP, you automatically have legal rights over your creation. Unregistered forms of IP include copyright, unregistered design rights, common law trademarks and database rights, confidential Information and trade secrets. With **registered** IP, you will have to apply to an authority, such as the Intellectual Property, If you do not do this, others are free to exploit your creations. Registered forms of IP include **patents, registered trademarks and registered design rights**. Copyright is also registerable.

OBJECTIVES

- To understand about the **Intellectual property** .
- To understand about the process of **copy right**.
- To understand the functions of **Patent**.
- To know about the **products design, drawings and models**.
- To understand about different **Trademarks**.

PERFORMED ACTIVITIES

The webinar began with a prayer song by Bedsubha D.S, Student of II MSW, Ms. Ajisha.S, II MSW delivered the welcome address. She welcomed the Secretary, Rev.Fr.Eckermens Michael and the Principal, Dr.Meenakshi sundara Rajan of Nanjil catholic College of arts and science, kaliyakkavilai. Then she welcomed the resource person,Dr. E. Enanalap Periyar Assistant Professor Dept. of Criminology and Criminal Justice, Manonmaniam Sundaranar University and Mary Pelsit, HOD and Dr.S Ponni,and Advocate Krishna Prasad and all other participants. Dr. E. Enanalap Periyar explained about; Copy right , Patents , Designs and Trademarks,

Copyright

India is a signatory to the Berne Convention on copyright. However, it may be a good idea to register your Copyright as doing so may help to prove ownership if there are criminal proceedings against infringers. In most cases though, registration is not necessary to maintain a copyright infringement claim in India. Registration is made, in person or via a representative, with the Copyright Office. Since 2016, copyright Policy was moved to India's Ministry of Commerce and Industry. All IPRs are now administered by the Department for Industrial Property and Promotion (DIPP). Internet piracy of films, music, games and software is an issue in India, as is unauthorised copying of Physical books.

PATENTS

India's Patents Act of 1970, 2003 Patent Rules and the 2016 Patent Amendment Rules set out the law Concerning patents. The regulatory authority for patents is the Patent Registrar under the office of the Controller General of Patents, Designs and Trade Marks, which is part of India's Ministry of Commerce and Industry. Patents are Valid for 20 years from the date of filing an application, subject to an annual renewal fee. India's patent law operates under the 'first to file' principle – that is, if two people apply for a patent on an Identical invention, the first one to file the application will be awarded the patent.

DESIGNS

The laws governing designs are the Designs Act 2000 and the Designs Rules 2001. Designs are valid for a Maximum of ten years, renewable for a further five years.

TRADE MARKS

India's trade mark laws consist of the 1999 Trade Marks Act and the Trade Marks Rules of 2002 and 2017. The regulatory authority for patents is the Controller General of Patents, Designs and Trade Marks under The Department of Industrial Policy and Promotion. The police now have more robust powers in enforcing Trade mark law, including the ability to search premises and seize goods suspected of being counterfeit Without a warrant. But these powers are tempered by the requirement for the police to seek the Trade Mark Registrar's opinion on the registration of the mark before taking action. This adds to the delay and may Result in counterfeit goods being removed or sold. Trade names also constitute a form of trade mark in India, with protection, irrespective of existing trade Names, for those wishing to trade under their own surname. Because of the widespread practice of 'cybersquatting' – the registration in bad faith of marks by third Parties registering domain names for certain well known marks in order to sell them to the original rights Owners – it is advisable

for rights owners to register their domain names in India as trade marks as soon As possible. Registration takes up to two years. A trade mark in India is valid for ten years.

Dr. E. Enanalap Periyar interacted with the participants in the webinar and cleared the doubts.

OBSERVATION

The topic was explained clearly by the resource person. The participants gathered more ideas about the structure of INTELLECTUAL PROPERTY RIGHTS. The doubts of the participants were clarified thoroughly. The resource person managed the time perfectly.

LEARNINGS

- Learned about the importance of Intellectual property rights
- Learned about the different functions of IP rights
- Learned about Copyright, Patents, Designs, and Trademarks.
- Learned about the characters of IP rights.

FEEDBACK

Nandu Das- The thoughts of the resource person that made to think about the importance of IPR.

❖ Ajisha.S.M- Webinar is very useful for me,I got more ideas about particular topic

❖ Athira .S- The session was so good compared to others. It's so practical and can be applied and used in life. Thanks for the session.

CONCLUSION

At the end of the section Mr.Sajith.S, Student of II MSW, delivered the vote of thanks. Ms Hasafia.N.U, II MSW did the Master of Ceremony and the meeting came to an end at 10.20 am

WEBINAR REPORT ON 'INTELLECTUAL PROPERTY RIGHTS'

INTRODUCTION

Intellectual Property Rights (IPR) are the rights given to the persons over the creation of their minds. IPR is usually given to the creator as an exclusive right over the use of his/her creation for a certain period of time. As per the suggestions of UGC, students' community must have IPR awareness, so the department of physics organized a webinar on intellectual property rights on 10/09/2021 Friday at 10 am to 11 am through google meet. Seventy-eight participants participated in the webinar.

CONTENTS OF WEBINAR

WHAT ARE INTELLECTUAL PROPERTY RIGHTS?

Intellectual Property (IP) is a term referring to an intangible asset which may be a brand, invention, design or other kind of creation which a person or company has legal rights over it. Almost all business own some form of IP which could be an important business asset.

Common types of IP include:

Copyright: this protects written or published work such as books, songs, films, web content and artistic works:

Patents: This protects commercial inventions for example a new business product or process.

Designs: This protects designs such as drawings or computer models

Trademarks: This protects signs, symbols, logos, words or sounds that distinguish your products and services from those of your competitors

IP can be either registered or unregistered. With unregistered IP, persons automatically have legal rights over their creations, unregistered forms of IP include copyright unregistered design rights, common laws, trademarks and data base rights, confidential information and trade secrets. With registered IP, people will have to apply to an authority, such as the intellectual Property, if they do not do this, others are free to exploit their creations. Registered form of IP

includes Patents, registered trademarks and registered design rights. Copyrights also can be registered.

OBJECTIVES

To understand about intellectual property

To understand about the process of copyright

To understand the functions of patents

To know about the product design, drawings and models

To understand about different trademarks

PERFORMED ACTIVITIES

The webinar began with the prayer song by greeshma of II BSC Physics. Ms.Ajina delivered the welcome address. She welcomed the secretary Rev. Fr. Ekermans Michael and the principal, Dr. Meenakshi Sundararajan of nanjil catholic college of arts and science, kaliyakkavilai, then she welcomed the resource person Adv. Sandra Renjith Kurishumuttam, (Advocate, Distric court, Trivandrum, Legal advisor, Lee laboratories) and all other participants. Adv. Sandra explained about copyright, patents, designs and trademarks.

COPYRIGHT

India is signatory to the Berne convention on copyright, it may be a good idea to register copyright as doing so may help to prove ownership. Registration is made in person with the copyright office, since 2016 copyright policy moved to India ministry of commerce and industry . All IPs are now administrated by department for industrial property and promotion (DIPP). Internet piracy of films, music, games and software is an issue in India as is an authorised copying of physical books.

PATENTS

India's patents act of 1970, 2003 Patent rules and the 2016 patent amendment rules set out the law concerning patents. The regulatory authority for patents is the patent register under the office of the controller general of patents, designs and trademarks which is part of India's ministry of commerce and industry. Patents are valid for 20 years from the date of filing an application, subject to an annual renewal fee. India's patent law operates under the first to file

Learned about copyright, patents, designs and trademarks

Learned about characters of IP rights

FEEDBACK

Mr. Rooban, the thoughts of the resource person that made to think about the importance of IPR

Ms. Malavika-The webinar is very useful for me , I got more ideas about the particular topics

Ms. Gopika - The session was so good. It's so practical and can be applied and used in life.

Thanks for the session

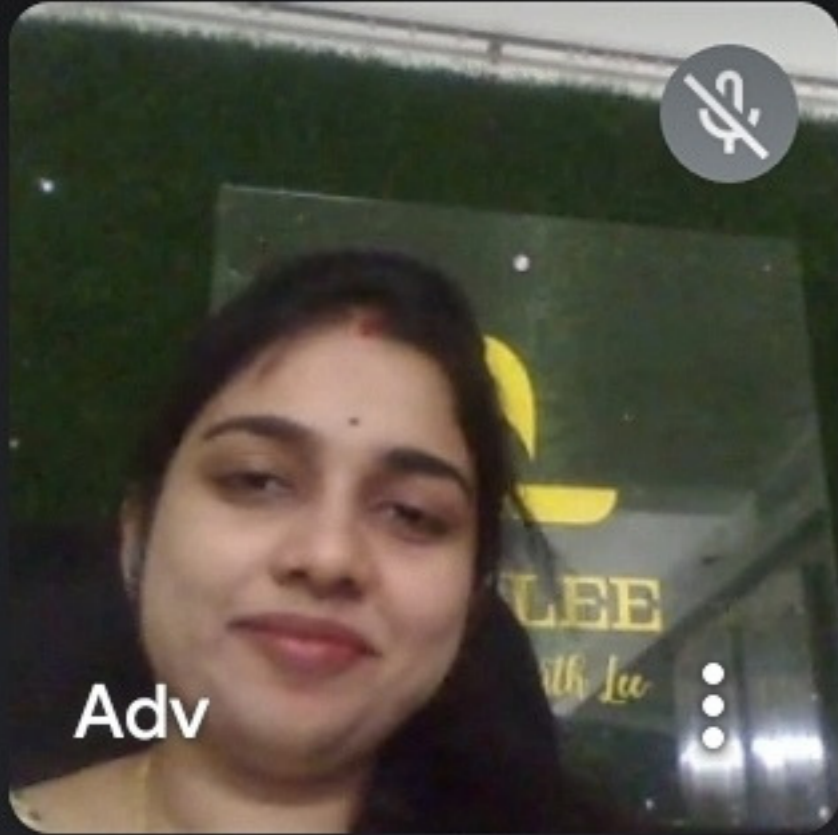

CONCLUSION

At the end of the session Ms. Jency paul student of II MSC physics , delivered the vote of thanks. Ms. Malavika of II MSC physics did the master of ceremony and the meeting came to an end at 11.30 am
