**REPORT ON ADVANCED LEARNERS (2022-2023)**

**Year : 2022-2023**

**Semester : Odd**

**Aim:** To choose students with better understanding and grasping power and focus on then to aim higher.

**Objectives:** The objective of advanced learners is to achieve to ensure that students may acquire the knowledge as desired after the completion of each module. To give additional help to students who lag far behind the rest of the class in the subjects provided.

During the academic year 2022-2023, the advanced learners are identified their level of skill and knowledge, their abilities and talents, their deficits, their learning styles, and their interests.

Special classes were conducted in each semester. 45% of the students attended the coaching classes. All the students those who attended the special classes have scored well in the Internal Exams.

One helpful way to expand the understanding of which the advanced students are in our classrooms is to explore their thinking, learning, and behaviour patterns in three broad categories:

1. High intellectual ability
2. Better creativity
3. Heightened sensibilities

Special attention and guidance has been given for the advanced learners. They were asked to revise the university question papers that they are able to score well. During special classes, the respective staff carefully observes the performances of students and give them appropriate assistance and encouragement so as to help them acquire the learning skills and

understand their own capability, thus enhancing self confidence and improve their learning skills. During the study circle the advanced learners study and help the low academic achievers by guiding and sharing notes and solving queries.

It was observed that the programming skills of these students need improvement. By the corrective measures taken from the previous year, the students are showing much improvement during the class hours.

## ADVANCED LEARNER'S REPORT 2022-23

The advanced learner's classes were held on every Friday from 1.45 to 2.00 pm in the College. In this section previous question papers, additional notes, power point presentations, group discussion, weekly test, multiple choice question were conducted and discussed.

5 students from I BBA, 5 students from II BBA and 5 Students from III BBA were selected for advanced learner's class.

The students are selected based on their performance in internal marks i.e., those who scored above 20 they were asked to prepare more notes on each topic and get the signature from the concerned staff.

Students were asked to refer more books from the college and department library. They were asked to refer and take more information from the net and to update their knowledge on each subject. They were also encouraged to get University ranks and taught the way to present the answers in the exams for scoring more marks.

This section helped the advanced learners to know more about the syllabus and to improve their skills. The advanced learned coaching was very useful and the students were able to bring laurels to the college

The Department of Physics conducted the bridge course for the students of 2022-2023 batch for four days, from 8<sup>th</sup> August 2022 to 12<sup>th</sup> August 2022. Each day is divided into five sessions. The sessions were handled by the staff of the Physics and English departments. In the first day, Dr.Amalanathan explains the rules and instructions to be followed by the students. He also gave an introduction to the Physics Department. Basics in physics and UG level physics syllabus were taught in physics session. The laboratory instructions were given to the students. Some of the basic experiments were explained by Mrs.V.Beena and Dr.Dominic. The Mathematical preliminaries were taught by Mr.F.Sahaya Raj. The last day of the session is handover to English to improve their communication skills. The students were learned and interacted with faculty about those subjects with much interest. Finally a test was conducted to check the outcome of student's knowledge in the bridge course.

ACADEMIC YEAR – 2022- 2023 (EVEN)

Department of Mathematics conducted Remedial classes for the slow learners in the academic year 2022 -2023 (Even). After the internal exam staff identified the slow learners and conducted classes from 4<sup>th</sup> January 2023 to 12<sup>th</sup> April 2023. Students attended the class from 1.45 pm to 2.45 pm on weekly once. Remedial classes gave to the all UG and PG students. Staffs provided simple notes to them and explained the topics to them. Staffs gave the old question papers to the students and asks them to study the repeated questions. The number of students attended the programme is given below:

**Remedial Class- Report  
Academic Year: 2022-2023 [ODD semester]**

The department of Chemistry conducted a remedial class for both B.Sc. Chemistry and M.Sc. Chemistry students at 2.00 to 3.00 PM in our own department classroom. Students were identified based on their performance in the Internal test especially those who were failed in their test as well who got low marks. Totally 56 students attended this class. Intensive coaching was given to students for their major subjects. All the five units were revised by the staff concerned and gave more previous year questions for their practice. If they need any explanation about the subject the staff incharge clarify their doubts during the class. Remedial class help the students to get more marks in their University exam.

**Remedial Class- Report  
Academic Year: 2022-2023 [EVEN semester]**

The department of Chemistry conducted a remedial class for B.Sc. Chemistry and M.Sc. Chemistry students at 2.00 to 3.00 PM in our own department classroom. Students were identified based on their performance in the class test as well as Internal test. Totally 58 students attended this class. Intensive coaching was given to students on the subjects. During class test were conducted after the revision given for students by the staff concerned and students were provided with previous year university question papers for preparation. Repeated questions were given for their practice. By remedial class UG students got good percentage in their Semester examination.

To the reply for that he gives a reply An apology for poetry. Stephen Gosson attack the poetry by giving 4 points. that are as follows.

- \* that a man could employ his time more usefully than in poetry
- \* and it is a mother of lies.
- \* and it is the nurse of abuse.
- \* that plato had rightly banished the poets for his ideal common wealth.

Sir Philip Sydney is a logician. The person who knows logic \* Poetry is Superior than philosophy.

\* Poetry is Superior than science because it gives moral lesson.

\* Poetry is superior than laws. Because it will encourage.

Greek → Plato, Aristotle, Homer

Roman → Horace, Ovid, Cicero.

Italian → Minturno, Castel verdo.

England → ? No one. So Philip Sydney should be the role models for the other writer.

Literary Criticism is not flourished in England.

Sir Philip Sydney's replies to the Stephen Gosson attack on the poetry:-

\* ~~First~~ First. Stephen says that a man could employ his time more usefully than in poetry. "No learning is sought that which teach and move towards virtue".

\* Poets are liars but every one under the sun are liars. Poets are the least liar under the sun.

~~Geometician~~ Geometician, Astronomer, Philosopher tells lies.

But poet did not affirm whether his statement is true.

\* Poetry doesnot abuse the man's wit. But the man's wit abuse the poetry.

\* Plato doesn't hate the poetry. he hates the poets of his age. Because the poet gives wrong opinion about the god and the famous heroes. Plato didn't tell about the poetry.

### Classicism:-

\* Respect for rules.

\* His advocacy for classical metres.

\* Respect for rules:-

Greek called poets as a maker; heavenly maker.

Romans called poets as a Prophet; gifted by foreknowledge.

English people will be the role models for the next generations.

Sir. Philip Sidney

Sir. Philip Sidney

~~He~~ was the first Englishman in critic. He was in the period of 16<sup>th</sup> century. He was the model in the Elizabethan courtier gentlemen. He participated in the battlefield Zutphen. He got wounded and ~~he~~ ~~the~~ suffered by thirsty and bleeding. He got water because of thirsty and he give it to another man who is suffering similar like him. He said, "Thy need greater than mine." ~~He~~ After ~~he~~ that he out from the army and start reading books.

Stephen Gosson write the book School of Abuse. He write against poetry in this book. Philip Sidney gives replies to his 4 charges in the book of Apology of poetry.

## 4 Charges

\* That a man could employ his time more usefully than in poetry.

\* That it is the mother of lies.

\* That it is the nurse of abuse.

\* Plato ~~says~~ had rightly banished the poet from its commonwealth.

## Argument of his book.

Sidney is the Logician. that is those who follows logics. He says that poetry is the oldest form of learning. He says that poetry is superior than others. Because, it is superior to philosophy by its charm, it is superior to history by its universality, it is superior to science by its moral end and it is superior to law by its encouragement of human rather than its civic goodness.

Sidney's replies for the 4 charges of poetry.

1. Sidney dismisses the first charge

by saying that "no learning is so good as the teach and to moveth to the virtue. and that none can teach more good as than poetry. So, Sidney says that poetry is not a waste of time.

2. He gives the replies for the second charge that the poets are not the liars under the sun the poet is the least liars. He gives some examples that astronomer, geometrician were <sup>gives</sup> the falsehood statements.

nothing affirms ~~that poet~~ and others therefore never lieth. So, what he presents is not fact but fiction embodying truth as an ideal part.

3. The reply for the third charge is that it is not the abuse. Men's wit is a men's wit that it is abuses poetry facts. Philip says This not an abuse

4. The objection for the 4<sup>th</sup> replies is that <sup>why</sup> Plato found poetry with fault. In fact Plato <sup>men's</sup> he's not against the abuse to

his contemporary poets who found the  
wrong statements and misrepresentation about  
his popular believes. So, Philip Sidney gives  
these replies to the charges for Stephen  
Glossan.

Literary Critics & Approaches. Literary CriticsPhilip Sidney

Philip Sidney was born on the year of 1554 and was died in the year of 1586.

Philip Sidney was a model of the Elizabethan and he was also an gentleman. Morally he was wounded in the battle <sup>and</sup> and he was in the thirst of bleeding. In spite of being in the thirst he had a bottle of water, he had given the water to the poor old soldier in the war who had been affected more than of him. he taught that, he says.

"The need is bigger than my need"

Stephen Gosson is a man who published the book of "School of abuse" which was contended and has not

accepted by the Sidney and had published the book named "Apology of poetry". In this book he had given the statement of his own which had been published after of his birth.

Stephen Gosson has arised four attacks based on the poetry. They are.

- \* The man could employ his time more useful in poetry

- \* ~~Mother~~ Mother of lies

- \* nurse of abuse

- \* plato has rightly banished the poet from the ideal of the common wealth.

The arguement of Sidney of the Gosson's four attacks are replied by philip Sidney, and the replies are.

(1) The man could employ his time more useful in poetry:

The reply given by Sidney was said to be, Sidney dismisses the first charge as

he says that he has already established that no learning is so good as the virtue and that none can be both teach more, there as more as poetry.

Mother of lies:

He replies to the second objection is that of the poet are liars they used to write under the sun. The poet is the least liar as based of geomatricians, historians and others all make false the false statement. Nothings affirms and therefore they never being to tell nor what is wrong. The present fiction embodying the truth to the ideal kind

use of abuse:

To the third charge Philip Sidney says that it doesn't by the man's wit. it is the mans abuse. All act is misused. and are less valuable as when rightly employed.

\* Plato has rightly banished the poet from the ideal of common wealth.  
Philip Sidney fourth rejection on the poetry was as he considered why Plato found fault with the poetry, men was not against the poetry and against the contemporary poets when felt, the wrong opinion on the god about popular beliefs to Plato banishing the the abuse of poetry.

Stephen Gosson was a most popular Satirist writing during the renaissance period.

⑩ BA English A1.

Sir Philip Sydney:

His life period is 1554-1586. He was an Elizabethan writer during 16th<sup>th</sup>. He read the book "The School of Abuse", which was written by Stephen Gosson. While Sydney read this book, he got angry and wrote a book, "An Apology for Poetry" which was the reply for the Stephen Gosson.

Sydney replies the four charges made by Stephen Gosson.

- i) Poetry is waste of time.
- ii) Poetry is mother of lies.
- iii) It is nurse of abuse.
- iv) Plato had rightly banished the poets from his ideal republic.

Poetry is waste of time:

Poetry gives more way of gaining knowledge. In earlier society, poetry plays the main source of education. This poetry teaches awareness to the readers. The right way to education is poetry. In this case, it gives

⑤  
knowledge and education, so this poetry is not a waste of time.

Poetry is mother of lies.

Poet do not lies. The poet does not declare the fiction in the true manner. Poetry is more ideal and Universal. Through this we can learn more. So poetry cannot be a mother of lies.

It is nurse of abuse.

Man abuses poetry, but poetry does not abuses man. People treats poetry badly. History, Philosophy abuses than poetry. Battles, blood shed, violence these are the things where in the history, and philosophy. But poetry is the light to knowledge. So poetry is not nurse of abuse.

Plato had banished poets.

In Republic which is the work of plato, he says about the abuse of poetry, but plato never says to banish the poet. The poet who doesn't instruct the children means, banish them. Plato ~~do~~ he do not stands against for poetry.

Test Note

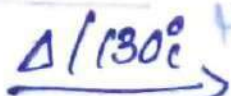

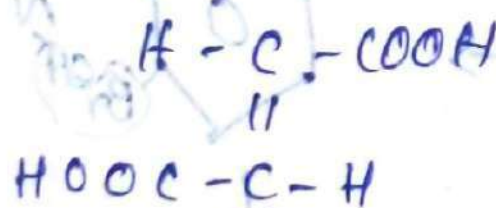

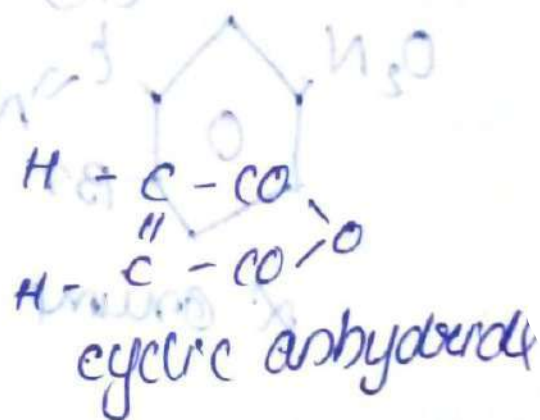

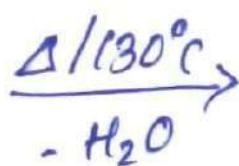

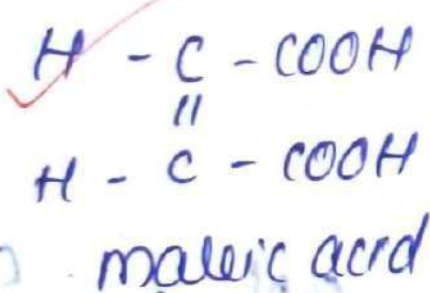

1/8/2022 Methods to assign configuration:

Dehydration (chemical method)

Intermolecular reaction possible only if the reacting groups are closer together in a molecule.

In maleic acid - COOH groups are closer to each other.

On heating it undergoes dehydration to form cyclic anhydride. But fumaric acid does not form anhydride in its own.

No action.

Thus maleic acid is cis isomer and fumaric acid is trans isomer.

# Method of cyclization (chemical method)

2 bromo 5 nitro acetophenol

exist in two isomeric form. The

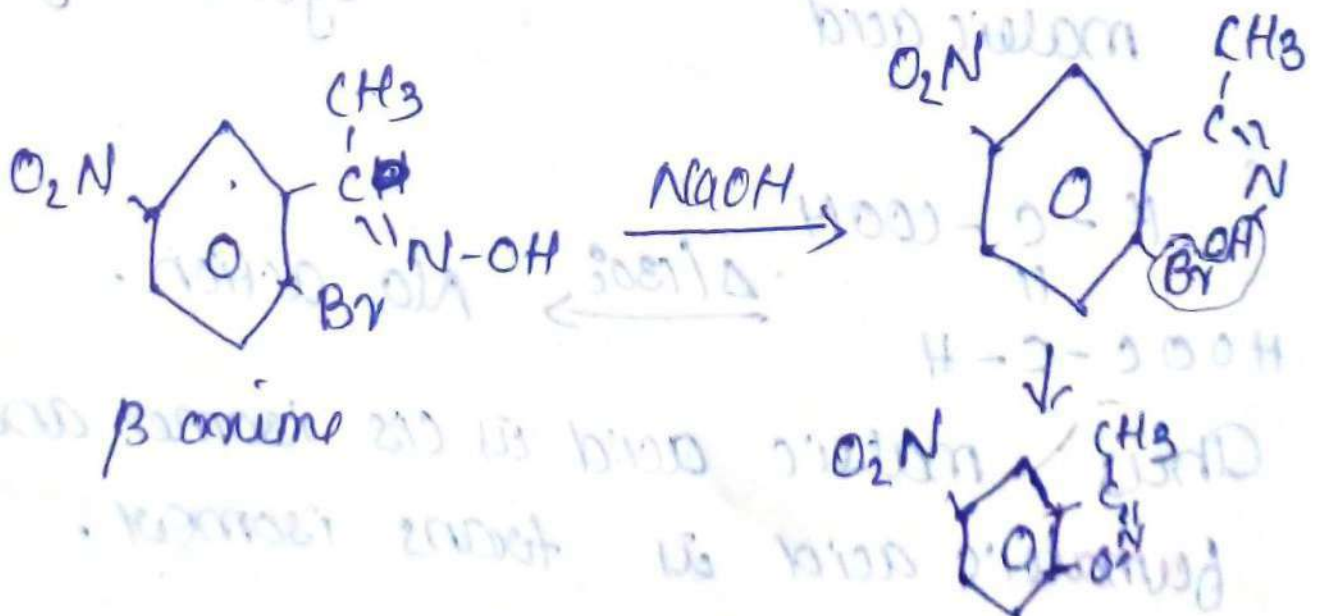

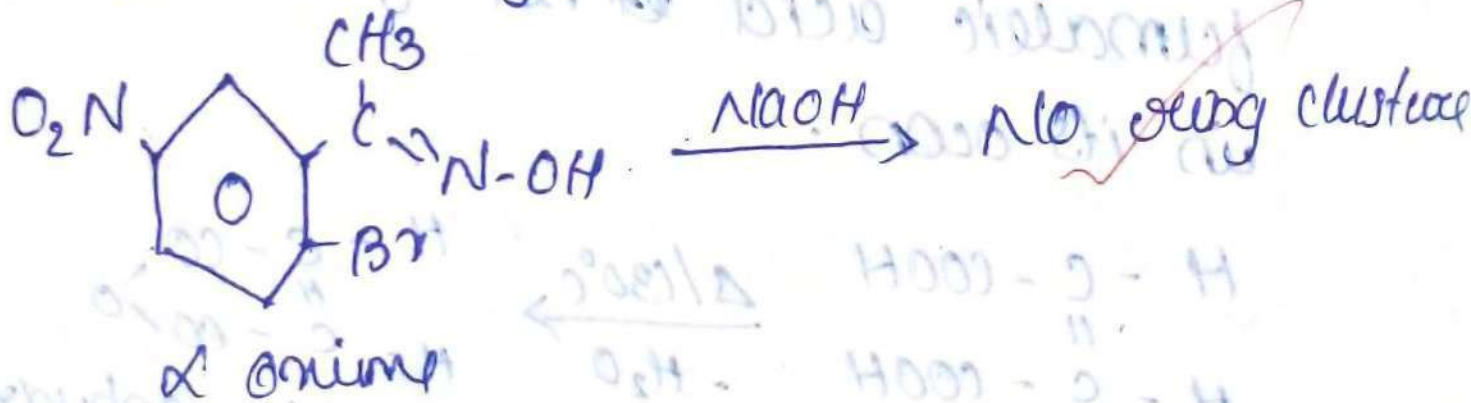

$\alpha$  oxime is unaffected with NaOH.

The  $\beta$  oxime forms 3 methyl 5 nitrobenz

Zen-oxime. The  $\alpha$  oxime exist in

syn. methyl isomer &  $\beta$  oxime exist in

anti. methyl isomer

## Dipole moment studies-

Dipole moment is a vector quantity. The trans isomer may cancel each other. Therefore cis isomer has higher dipole moment than trans isomer. trans has zero dipole moment.

## Melting point.

The cis isomer has lower melting point. Therefore trans isomer has higher melting point than trans isomer.

eg: Melting point of maleic acid is  $130^{\circ}\text{C}$   
" " of fumaric acid is  $287^{\circ}\text{C}$

# conformational analysis of n-Butane

n Butane contains is formed from  
from methane by the replacement  
of hydrogen by two methyl group.

Rotation of  $C_2-C_3$  axis,  $C_2$  is fixed and  
 $C_3$  is rotated.  $(CH_3-C-C-C-CH_3)$

Rotation of  $C_2-C_3$  axis by  $60^\circ$ .

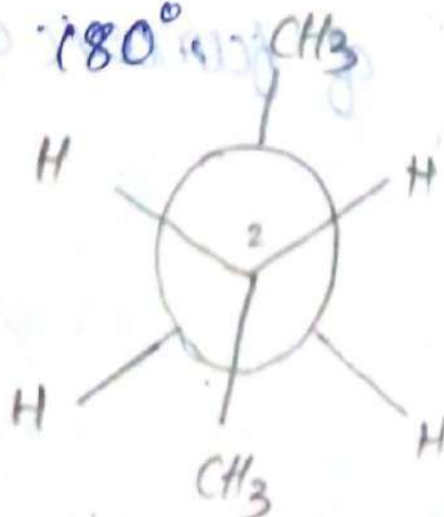

The conformation is anti form.

The anti form is free from torsional  
strain and Vander Waals strain

So the energy is low and

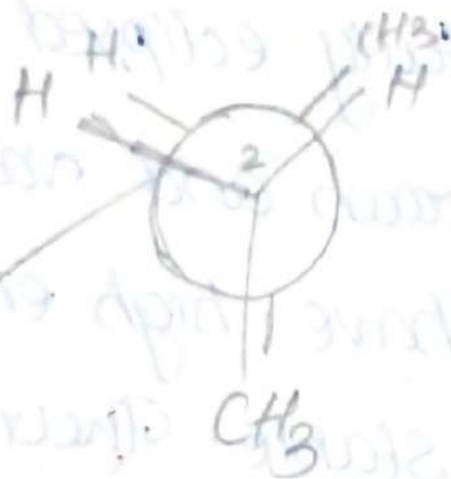

more stable. The dihedral angle

is  $180^\circ$ .

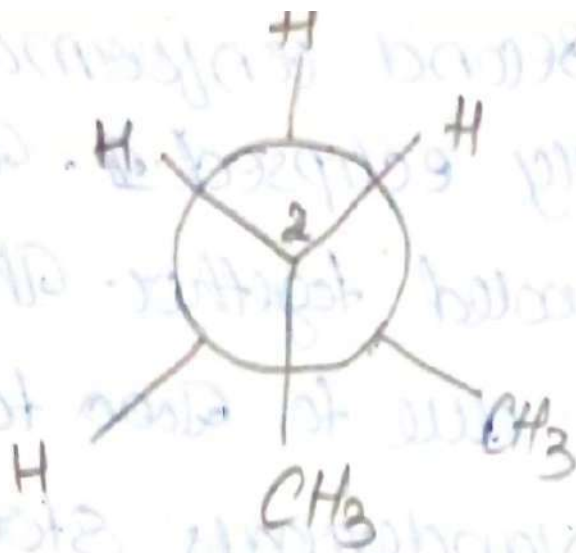

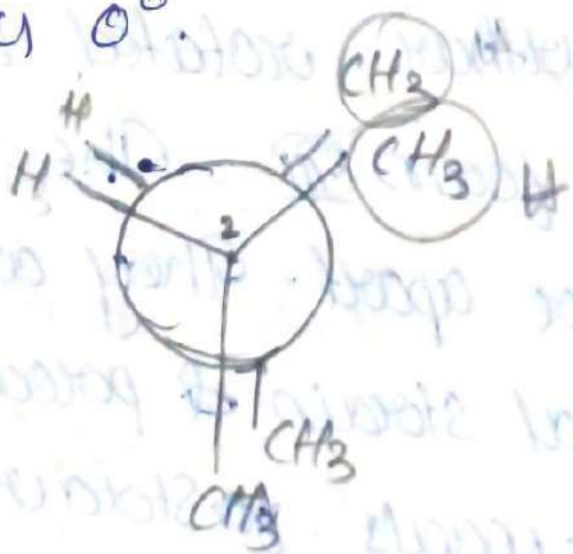

- The second conformation is partially eclipsed II. The bulky group are crowded together. They have high energy due to torsional strain and van der Waals strain. It is less stable. Their dihedral angle is  $120^\circ$ .

It further rotated to form the gauche form III. The bulky groups are far apart. They are free from torsional strain & produce the van der Waals strain. They have high energy & less stable. Their dihedral angle is  $60^\circ$ .

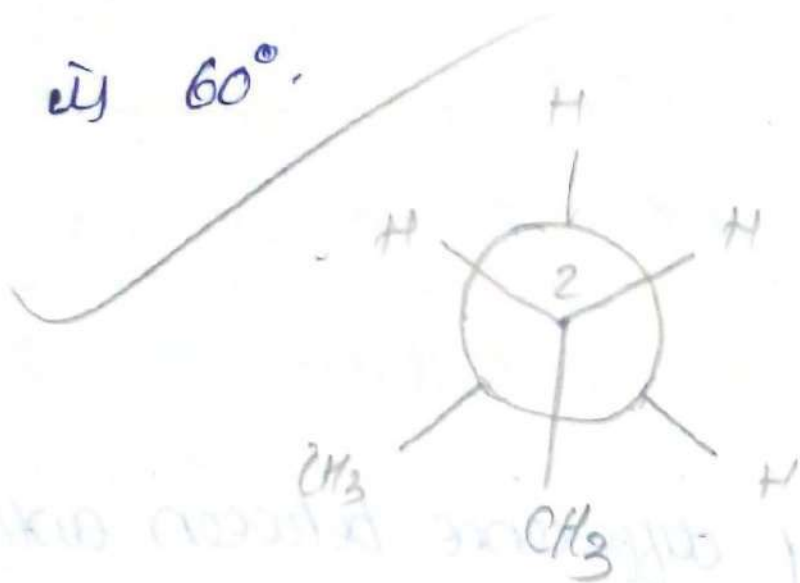

The gauche form is further rotated to form fully eclipsed IV. It has torsional strain and van der Waals strain and has high energy. They are less stable. Their dihedral angle is  $0^\circ$ .

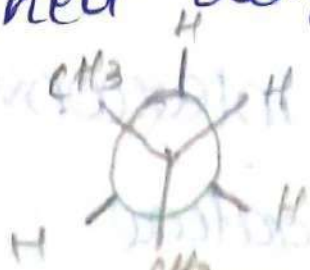

The conformation IV is further rotated to form Gauche form V.

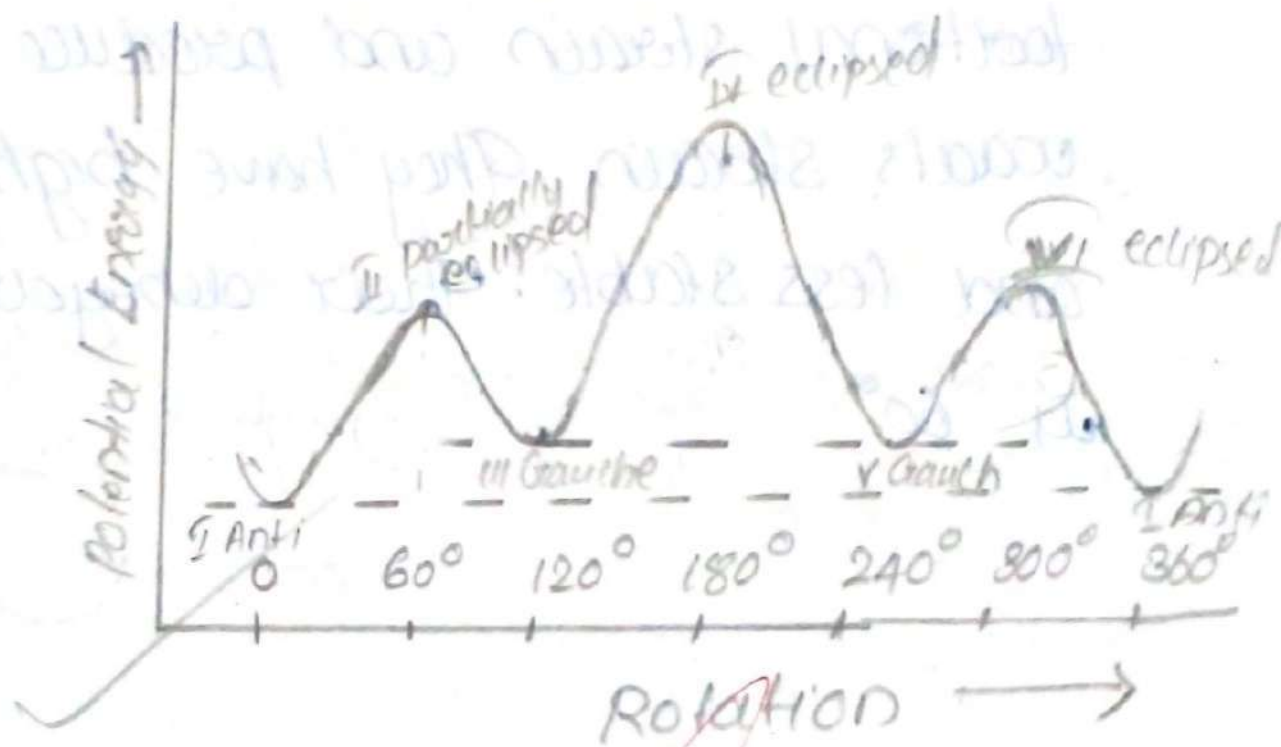

The gauche forms have bulky group as far apart. They are free from torsional strain and produce van der Waals strain. They have high energy and less stable. Their dihedral angle is  $60^\circ$ .

The VI conformation is partially eclipsed VI. In this the bulky groups are crowded together. They have high energy due to torsional strain and van der Waals strain & have less stable. Their dihedral angle is  $120^\circ$ .

## Energy diagram

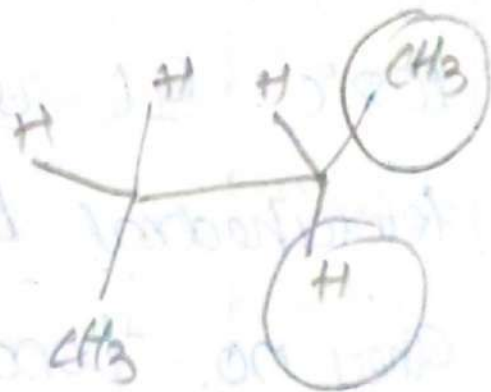

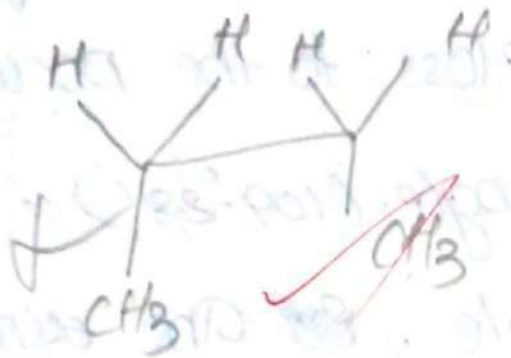

The energy difference between anti conformation fully eclipsed is  $15.06 \text{ kJ/mol}$ .

The energy difference between anti form and eclipsed is  $12.13 \text{ kJ/mol}$ . The energy difference between anti form and gauche form is  $3.35 \text{ kJ/mol}$ .

The energy barrier difference in n-butane are interconvertible under room temperature.

The most preferable conformation of n butane is anti conformation.

## 1. Adaptation

The organism change in there environment from one place to another for their fitness of Survival. they are as they follows

### 1. Protective covering

The Outer covering is made of thick cuticle it protect the parasite from the digestive enzymes of the host.

### 2. Loss of locomotory organ

\* The parasite depend on the host for their food when present inside the host

\* So there is loss of locomotory organ

\* The colour of the animal is reddish yellow

The development of a fertilized egg without fertilization is called parthenogenesis.

The parthenogenesis is divided into two types, namely, natural

- \* Natural parthenogenesis.
- \* Artificial parthenogenesis.

### \* Natural parthenogenesis :

parthenogenesis occurs naturally is called as Natural parthenogenesis. In this method there is no fertilization. In this method no males are produced. All are females.

↳ The natural parthenogenesis, complete parthenogenesis, is divided into is two types namely,

- \* Arrhenotoky
- \* Oelutoky.

### \* Arrhenotoky

The process of development of  
\* It is a type of parthenogenesis. It is found in insects.

- \* Arrhenotoky is process of development of the haploid organism.
- \* It is haploid parthenogenesis.

- \* haploid eggs are produced.
- \* The male are fertile. During the formation of spermatogenesis, the reduction is omitted.
- \* The females are haploid in nature.
- \* Thus the parthenogenesis occurs.

### Thelytoky

- \* The process of formation of diploid egg is called Thelytoky.
- \* It is a type of parthenogenesis.
- \* It is a diploid parthenogenesis.
- \* The development occurs without fertilization.
- \* Thelytoky based on its meiotic division, divided into two types namely,
  - \* meiotic Thelytoky
  - \* Ameiotic Thelytoky.

### \* Meiotic Thelytoky

The fertilizing development occurs by the meiotic division. The eggs are haploid in nature. After the meiotic division it becomes diploid.

### \* Ameiotic Thelytoky

The development occurs without the meiotic division. The meiotic division is absent, and mitotic division occurs. The eggs are haploid.

Meiotic thelytoky is divided into two types  
namely,

i) Restitution

ii) ~~Autofertilization~~

ECG is a record of electrical impulse generated from heart is known as Electro cardio graph impulse.

The Heart is made to beat

the impulse from the heart is known as Electro cardio gram.

the heart produce an impulse from sinus aviculum.

the impulse is recorded in a paper called ECG paper.

The ECG paper contain and it has horizontal line and vertical lines

the Horizontal waves in ECG paper.

\* The ECG is discovered by  
Eilvorth William.

\* ~~ECG~~ ECG is used for identifying  
the heart diseases.

\* The Electro cardiogram  
has P, Q, R, S, T waves.

\* The P, R, T <sup>✓</sup> is an upward

P wave.

P is a positive wave. P wave  
is also called aretrial complex.  
It is a first wave. It represents  
the wave of depolarisation that

### Q, R, S wave

It is called initial ventricular complex. The average waves is 0.06 to 0.1 sec.

### Q wave

It is the first downward wave. In this stage the inverse arrive at inter ventricular septum and the septum contacts. Hence is Q is caused by the activity of septum.

### R wave :

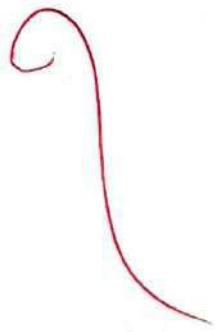

R is the second upward deflection. It is the tallest wave with the represent ventricle. The amplitude are the activity of right

## Structure of sperm.

A sperm possesses three main regions, namely the head, the middle piece and the tail.

### Head:

- \* The head has different shapes in different species.

- \* It may be long and slender and flat or corkscrew-shaped or in the form of crescent or hooked.

- \* The head contains two important parts, the acrosome and the nucleus.

- \* The acrosome is in the form of a cap at the tip of the head.

- \* Behind the acrosome lies the compact nucleus carrying the haploid number of paternal chromosome.

### Middle piece:

- \* The head is followed by a distinct middle piece.

- \* In some species, a short neck can be noticed between the head and the middle piece.

\* The middle piece has two centrioles a proximal and distal centriole.

Proximal

\* The centriole situated at the posterior surface of the nucleus.

\* The distal centriole situated just behind the proximal one.

\* The main bulk of the middle piece is composed of Mitochondria, the 'power-plant'.

\* They may be granular, ribbon-shaped or spirally-coiled. In some instances, they are con-

\* The mitochondria supply energy for the movement of the sperm.

\* The entire middle piece is surrounded by a peripheral layer of cytoplasm called manchette.

Tail:

\* The tail has two distinct regions, namely the main piece and the end piece.

\* The central core of the tail is formed of an axial filament.

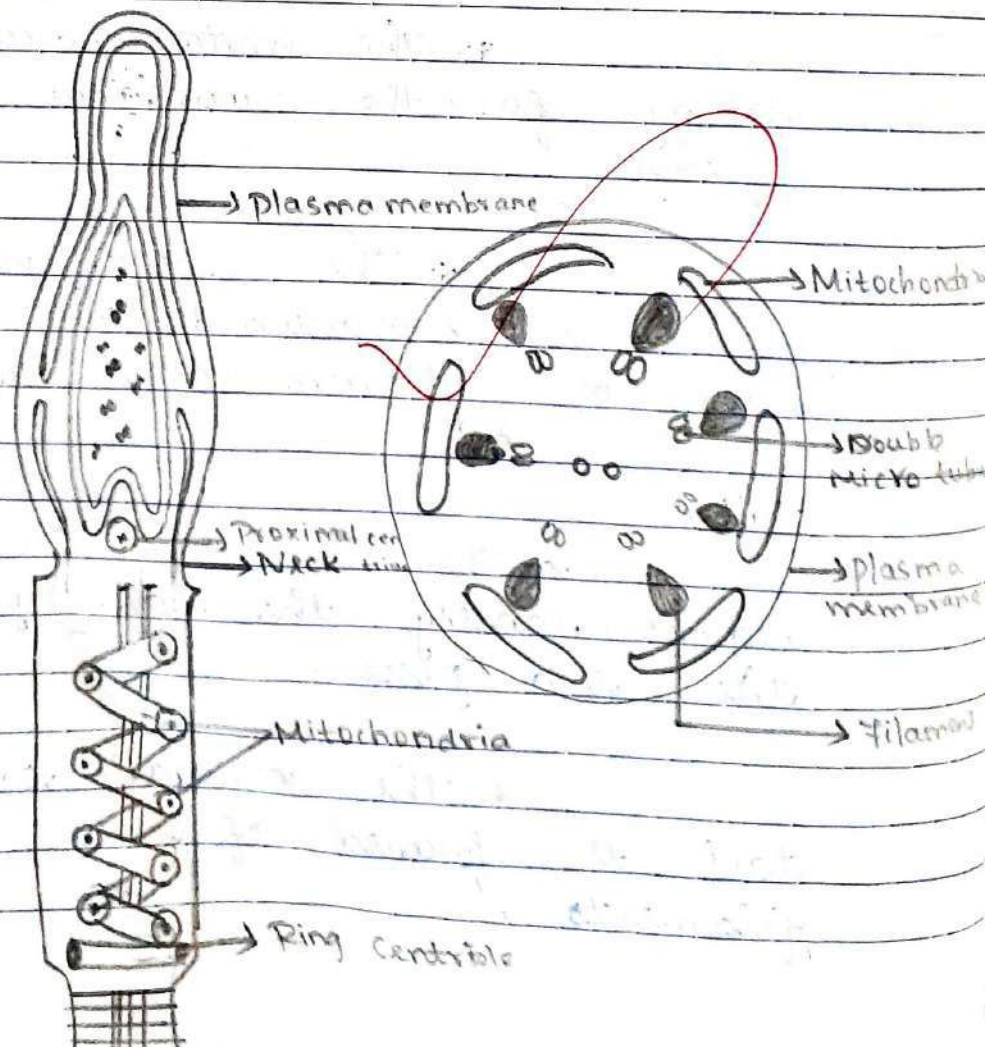

\* The axial filament is composed of two central microtubules surrounded by a ring of nine double microtubules.

\* This ring of microtubules is surrounded by another ring of nine filaments.

\* These filaments are absent from the end piece.

\* The entire tail of the sperm is surrounded by a thin film of cytoplasm and a plasmalemma.

## Role of Enzyme in carbohydrate digestion

good

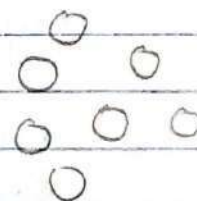

Carbohydrate is a main source of diet. The human diet contain 60% to 83% of carbohydrate. Carbohydrates gives a bulk of energy. The break down of complex carbohydrate into monosaccharides are known as carbohydrate digestion.

carbohydrate

disaccharides

Monosaccharide

## Places of carbohydrate digestion.

The carbohydrate is digested in buccal cavity, stomach and intestine.

## Glands involved in carbohydrate digestion:

The digestion of carbohydrate are helps to digest:

- \* Salivary gland
- \* Pancreas
- \* Gastric Glands
- \* Intestinal Glands

Enzymes involved in carbohydrate digestion:

The enzyme involved in a carbohydrate digestion are.

- \* Ptyalin
- \* Maltase
- \* Sucrase
- \* Lactase
- \* Cellulase

Ptyalin:

Starch is digested by Ptyalin. Ptyalin is secreted from Salivary gland. First of all, the starch is dissolved in soluble starch and it converted into erythroblast<sup>dextrine</sup> and it splits into acroblast<sup>dextrine</sup> and it convert into maltose

Starch → Soluble Starch → erythroblast<sup>dextrine</sup> →  
Maltose ← acrodextrine ←

Glycogen:

Ptylin hydrolysis a glucose into Maltose

Maltase:

Maltose is digested by Maltase. It is secreted from Salivary gland. the maltose is converted into two glucose

Maltose  $\xrightarrow{\text{Maltase}}$  Glucose + Glucose.

Sucrase:

Sucrose is digested by Sucrase. It is secreted from Salivary gland and gastric gland. It converted a glucose and Fructose.

Sucrose  $\xrightarrow{\text{Sucrase}}$  Glucose + Fructose.

Lactase:

Lactose is digested by Lactase. It is secreted from gastric gland. It converted into glucose and galactose.

Lactose  $\xrightarrow{\text{Lactase}}$  Glucose + Galactose

Cellulase:

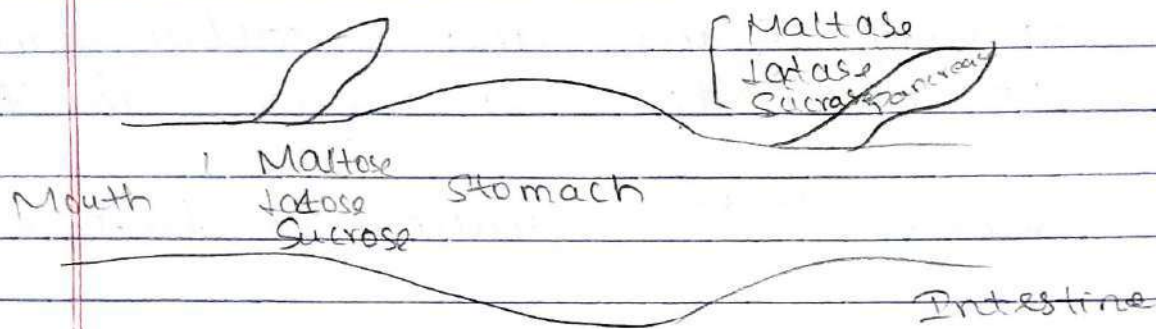

Cellulose is digested by Cellulase. Man cannot digest cellulose. The herbivorous the alimentary canal contain many bacteria and protozoa.

The ruminant animals cannot digest the cellulose. The bacteria are digest the food of rumen. The cellulose is converted into acid like lactic acid, Phosphate etc.

In rabbit the food is stored in caecum and it stored for 3 to 4 days and it excreted through excretory canal.

And it eat and it stones in  
caudal stomach. and excreted  
out by hard pellets.

Patterns of cleavage

There are two types of cleavage

- \* Holoblastic cleavage
- \* meroblastic cleavage.

① Holoblastic cleavage

\* When the entire egg divides is called Holoblastic cleavage or total or complete cleavage.

\* In this cleavage the blastomeres are equal in size the cleavage is said to be equal

blastomeres  
unequal  
↓  
unequal

\* Holoblastic cleavage divides into four types.

- \* Radial cleavage
- \* Bilateral cleavage
- \* Spiral cleavage
- \* Biradial cleavage
- \* Rotational cleavage

② Radial cleavage

\* The Blastomeres are arranged Radially around the central axis of the egg.

\* It look like symmetry of wheel.

\* the embryo has a radial symmetry

## ② Bilateral cleavage :

\* Cleavage produces Bilateral symmetry is called Bilateral cleavage.

\* It is Bilaterally arranged.

eg: Ascidian and cephalopod moll.

## ③ Spiral cleavage :

\* Blastomeres in the form of spiral appearance.

\* It is spirally arranged.

\* Spiral cleavage form clockwise is called dextral spiral cleavage.

\* Spiral cleavage form anticlockwise is called sinistral.

eg: Annelids, Molluscs.

## ④ Biradial cleavage:

\* The first two cleavage are Meridional

\* The ~~if~~ third cleavage plane is vertical.

\* It form curved plate of cells arranged in two rows of each four each with the central cells longer than the end ones.

## ⑤ Rotational cleavage:

\* When the first cleavage is Meridional, second cleavage ~~is~~ takes place from one blastomere passes through the polar axis.

\* It rotated  $90^\circ$

## ⑥ Meroblastic cleavage

\* When a portion of egg divides is called partial or incomplete cleavage.

\* It consists of the following types.

\* Discoidal cleavage.

\* Superficial cleavage

\*

## Discoidal cleavage:

\* The cytoplasm present in the animal in the form of disc is called blastodisc

\* The disc only undergoes division

eg: birds

## Superficial cleavage:

\* cleavage takes place in the surface of the egg. Does not take place extends into the central part.  
\* Does eg: Insect egg.

## Classification of cleavage.

Two types.

\* Determinate cleavage

\* Indeterminate cleavage

### Determinate cleavage.

Cleavage producing predetermined blastomeres develop into particular organ. Such embryo is called mosaic embryo. The development is called mosaic development. The egg is called mosaic egg.

## Biodiversity Hotspots in India.

Ecology

KIRAN.  
11 BSC Zo

Hotspot is the bio-rich area. It is filled with plants and animals of endemic species.

### Criteria for designation of hotspots

There are criteria followed to design the hotspot.

- \* The plant diversity of endemic species should be basis.

- \* The area must have atleast 1500 species of plants i.e.  $\frac{1}{2}\%$  of global total plants.

- \* The area should lost its <sup>70% of</sup> original habitat.

- \* The endemic vertebrate should be high in this area.

- \* The area should be in the threat

- \* The area should have the wealth of useful plants.

At present there are 34 hotspots in the world. It means 2.3% of land in the whole world Earth.

In India there are 4 hotspots

1. Himalayas
2. Indo-burma
3. Madagascar and Indian Ocean Island
4. Western Ghats

### Western Ghats as hot spot

\* Western ghats is one of the hotspots in India. It extend from the Tapi river in Gujarat to the southern tip of peninsular.

\* It covers Maharashtra, Goa, Karnataka, Kerala, Tamil Nadu, Sri Lanka.

\* The western side receive heavy rainfall and eastern side receive less rainfall.

\* The western sides have tropical evergreen forest, and eastern side have tropical deciduous forest.

\* The western ghats occupies 5% of the Indian land. But it consists of 4500 species of flowering plants of 17000 species.

\* It is rich in flora and fauna.

\* The plants, invertebrates and vertebrates in this area are 70% endemic species.

In India

In western Ghats there are

13 species of mammals

12 species of birds

108 species of freshwater fishes

89 species of reptiles

88 species of amphibians.

Human reproductive cycle includes following:

✓-good

- 1) puberty
- 2) spermiation
- 3) ovulation
- 4) menstruation
- 5) pregnancy
- 6) parturition (birth) ✓

The various hormones include in sexual activity:

- 1) FSH (follicle Stimulating Hormone)
- 2) LH (Lutenizing Hormone)
- 3) Androgens

- 8) prolactin ✓

The glands involved in human reproduction

- 1) Testis
- 2) Ovary
- 3) pituitary gland
- 4) Corpus luteum ✓
- 5) placenta ✓

\* FSH and LH androgens causes the Graffian follicle.

\* In man the Secondary Sexual Characters are beard, Moustache, ~~Masculine~~ Voice etc. produced by androgens.

\* In Woman the Secondary Sexual Characters are breast, hairs in restricted area and feminine voice etc. are produced by Oestrogen.

\* The Graffian follicle ruptures under the Ovary influence of FSH.

\* The LH ripens the egg in the Ovary

\* The LH ~~they~~ Ovary in the Ovulation  
The Ovulation occurs on the 21<sup>st</sup> day from the Menses.

\* The ruptured Graffian follicle is develop from the Corpus luteum.

\* The growth and function of Corpus luteum are uterine Epithelium.

\* Corpus luteum ~~produce~~ <sup>secrete</sup> progesterone.

\* As the level of progesterone is increase and the level of Corpus luteum is decreased.

\* The development of uterine Epithelium or lining and prepares the ~~uterus~~ the entrance or receiving the Embryo.

\* The ~~process~~ development of Embryo or foetus in the female body is called pregnancy.

\* They are the approximately 280 days in the 28<sup>th</sup> day of Menses.

\* The Corpus luteum is connected to the ~~and~~ corpus luteum with connective tissue sacs called ~~connective sacs~~ or Corpus albicans.

\* The Progesterone and Oestrogen is increased during pregnancy.

\* Oestrogen stimulates the hormone for the Uterine Muscle contraction.

\* The ~~period~~ of development of Embryo in the mother is called pregnancy or gestation.

\* Oxytocin Secretes the pituitary gland and produce the Uterine muscle contraction.

\* Relaxin Secretes the Ovary by the influence of enlargement of pelvis <sup>ligaments</sup> and birth canal.

\* prolactin Secreted by the pituitary gland for the secretion of Milk.

\* Before the birth there is no secretion of Milk. because the progesterone level is increased.

\* After the birth progesterone level is decreased and prolactin is secreted by the pituitary

1. Protective Colouuration:

The light influences the the protective Colouuration in the pigments called ~~protective~~ Melanophores.

It was exhibited in the leaf Insect.

It ~~can~~ change its colour is green colour according to the colour of the leaf. It can protect themselves from the predators.

The protection Colouuration is by the influence of light.

2. Colour changes:

According to effect of light, some organism have the ability to change its colour according to the object in the Environment. The <sup>More</sup> Dark light helps in the relaxation of eyes. Less light helps in the contraction of the cornea.

Example: Chamaeleon can change its body colour according the colour of the bark or any any objects in the Environment.

### 3. Effect of Light on temperature :

The intensity of Light plays a major role in the temperature. ~~It can~~ The temperature may be optimum when the intensity of light is high.

The temperature of the environment may fluctuate according to the intensity of light.

### 4. parthenogenesis

In Sea Urchin, the parthenogenesis is exhibited only <sup>by</sup> the influence of light.

It reproduce with out fertilization by the intensity of light.

### Development

The Development of Salmon, is only by the influence of the light.

### Locomotion :

The locomotion is influenced by the intensity of light. It can done only the sence of Light.

It is divided into four types,

namely,

Morphallaxis  
Phototaxis  
photomorphis.  
Photoaxis

## Morphallaxis :

The movement of the animal towards the speed of the light is called Morphallaxis.

## phototropism :

The movement of the animal towards the direction of the light is called photo-tropism.

The movement of only one part of the body toward the intensity of light is called

## photoaxis

The movement of male towards the female is called as photoaxis.

## 7. Lunar rhythm :

The influence of the light by rotation of moon around the Sun. It is a 29 day cycle.

It is divided into two types, full moon cycle and the half moon cycle.

## 8. Vision

The vision is influenced by the intensity of the light. Some animals exhibit different visions namely,

i) Eye spot in millipeds, centipeds etc.

Compound Eyes in the molluscs and crustaceans.

## 9. Reproduction

Reproduction is also influenced by the light.

Some animals reproduce only by the presence of light.

Some marine animals reproduce only on the full moon day.

## 10. Effect of Light on mutation

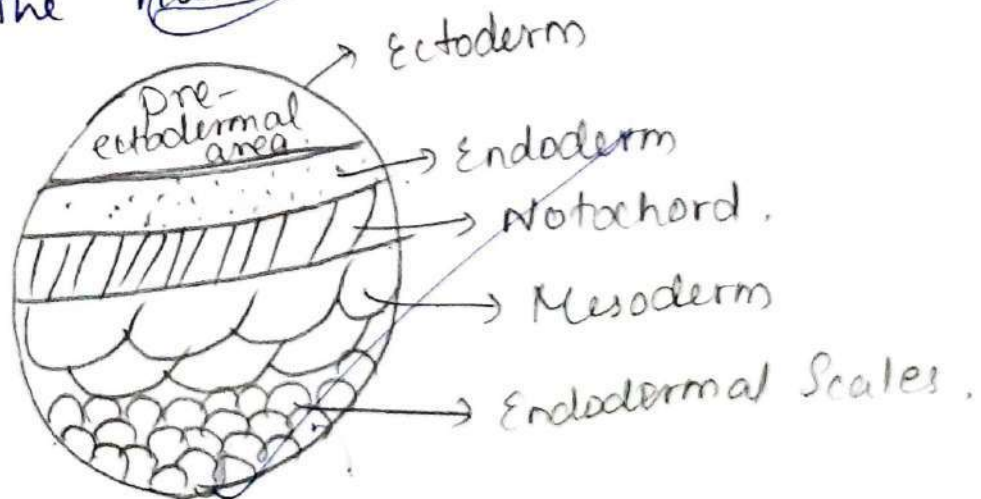

The gene mutation occurs due to the intensity of light.

The mutation occurs in RNA and DNA Molecule. It may bring sudden changes in the DNA molecules.

Hence, the light influences the gene mutation.

The ~~fate map~~ is seen in the following steps.

- i) The ~~macromeres~~ are develops from the endoderm.
- ii) The endoderm is followed by a region there is a notochordal area.
- iii) In between the endoderm and notochordal lies the precordial area.
- iv) On either side of the precordial area there lies the notochordal materials.
- v) The ~~micromeres~~ are develops from ectoderm.
- vi) The micromere are lies adjacent to the ~~ectod~~ mesoderm and ~~neuroectoderm~~.
- vii) The micromeres then develops into the neural tubes.
